PETITION REQUEST FOR EXPEDITED EXAMINATION

Dear Sir:

I, Eric Schneider, pro se Applicant, request expedited examination of patent application 10/604,598 due to improper publication that was inadvertently published 6/10/2004. Applicant had filed the application using EFS on 8/1/2003. Included in this submission was a Request Not to Publish. Applicant notified Office of Patent Legal Administration of this mistaken publication error. It was verified that Applicant is not at fault for this error and advised that this petition be submitted due to the mistake.

Applicant does not wish upon any other Applicant to ever have to experience the pain from such a mistake again particularly since non-publication request is captured as a data field and can be used to avoid possibility of human error. Applicant humbly asks the USPTO to implement a zero-tolerance policy so that a mistake like this never happens again.

Respectfully submitted,

August 18, 2004

Eric Schneider

pro se Applicant
